

Kate Hamada

Kaneohe, HI • (808) 772-0934 • kateh2@hawaii.edu
Professional Portfolio: <https://katehamada.github.io/>

Professional Summary

Computer Science senior (graduating Spring 2027) with internship and practical experience in full-stack web development and data analytics. Combines strong technical abilities across software engineering, UI/UX, and data analysis with clear communication and a fast-learning mindset.

Education

University of Hawaii at Manoa – Honolulu, HI
B.S. Computer Science | Overall GPA: 3.75
Expected Graduation: Spring 2027

Skills

Languages: Java, C, C++, Python, JavaScript, TypeScript, HTML/CSS, SQL
Frameworks & Libraries: React.js, Next.js, Bootstrap 5, Leaflet.js
Database & Tools: PostgreSQL, Navicat, Tableau, Git, GitHub, Cron Jobs
Core Competenceis: Full-Stack Development, Database Architecture, Data Analysis, UI/UX Design, Object-Oriented Programming (OOP)

Work Experience

Student Data Analyst – Sea Grant

02/2026 - Present | Honolulu, HI

- Data Analysis:** Analyzed energy and water datasets using Python and PostgreSQL to uncover key environmental insights for Sea Grant’s sustainability roadmap.
- Data Visualization:** Designed and published dynamic Tableau dashboards to visualize complex climate and usage metrics for internal stakeholders.
- Technologies:** Python, PostgreSQL, Tableau, and Navicat

Full Stack Web Developer Intern – Hawaii National Guard / P3I

06/2026 - 08/2026 | Honolulu, HI

- End-to-End Development:** Engineered a custom web application from front to back, featuring a responsive user interface and a robust backend database.
- Data Collection & Processing:** Built interactive input forms that feed directly into a centralized database, implementing validation to maintain data quality.
- Real-Time Data Analysis:** Programmed analytics features that transform raw user inputs into structured reports and analytical metrics.
- Automation:** Configured Github cron jobs to automate background email notifications for system inactivity, user deactivation, and admin alerts.
- Technologies:** TypeScript, PostgreSQL, React.js, Nextjs

Data Visualization & Frontend Developer Intern – Hawaii Data Sceience Institute

01/2026 - 05/2026 | Remote

- Collaborated with the Hawaii Climate Data Portal (HCDP) team on the Climate Atlast Evapotranspiration project.
- Developed a web application converting raw ASCII spatial datasets into optimized JSON data structures for real-time browser rendering.
- Integrated Leaflet.js mapping features to display dynamic spatial climate data layers interactively.
- Technologies:** TypeScript, Leaflet.js, React.js, and Next.js
